Revestimientos realizados por fusión de capas de PVC, que nos garantizan la resistencia a roces, abrasiones, fáciles de limpiar, retardantes de fuego...con una sencilla y rápida instalación podremos crear nuevos espacios o renovar sin necesidad de grandes obras.Su capacidad termoformable lo hace moldearse y adaptarse totalmente a la forma que deseemos revestir, convirtiéndose en el aliado perfecto para restauración o renovación de mobiliario. Además, al ser autoadhesivos nos facilitará su instalación asegurándonos un acabado perfecto. Aptos para colocar sobre cualquier superficie: madera, cemento, pintura, pladur, azulejo...

Films created by fusing together layers of PVC, guaranteeing resistance to a cuffing and scratching, easy to clean and fire-retardant, quick and easy to install to create new spaces or renovate existing areas without the need for major work. Thanks to its thermoforming capacity, it can be fully moulded and adapted to any shape, making it the perfect solution for furniture restoration or renovation. Its self-acheseive quality also makes it easy to install and guarantee a perfect finish. It is suitable for installing on all types of surfaces, including wood, cement, paint, plaster or tiles.

The image shows a close-up of a marbled paper pattern. The design consists of irregular, flowing veins of light beige and cream colors against a darker, muted greenish-grey background. The veins vary in thickness and direction, creating a complex, organic texture. In the bottom-left corner, there is a small black rectangular box containing the alphanumeric code 'EH152' in white, sans-serif font.

WD 811

WD163

WD163

A close-up photograph of a light brown wood grain surface. The grain is oriented vertically and shows a mix of straight and wavy patterns. There are several prominent, dark, irregular knots scattered across the surface, particularly on the left and right sides. The lighting is even, highlighting the natural texture and color variations of the wood.
